FYI, this is what Valerie indicated to the submitter regarding the anticipated decision on these.

Hi Peter,

I'm expecting that these will be "not likely to present an unreasonable risk," it's just a matter of confirming if/when a SNUR would be published under the new framework. These PMNs still have to be reviewed by OPPT senior management—I'll let you know as soon as I get the go-ahead to move forward.

Best regards,

Valerie

Valerie,

Can you give me an update/reminder as to the recommendation for these? Did it turn out that they were deemed "not likely to present risk"

Peter

Hi Gayle,

We're still working through our backlog at EPA, and these PMNs are making their way through the queue for review by upper management.

The Day 90s for these cases are 10/03 and 10/13. Can we suspend both to 11/12 so they're on the same schedule? I hope to get back to you with a determination before then. I'm cc-ing my colleague Meg who will also be helping track these cases moving forward.

Best regards,

Valerie

Hi Gayle,

I just briefed my supervisor on these cases today; it was agreed that we can move forward with sending these to upper management for a final determination. As we discussed on our last call, approval would be contingent on dermal protection and no inhalation exposure for workers. There might be additional follow-up regarding language in the SDS, but for now these are out of my hands until I hear back from upper management. I did emphasize that you would like to begin manufacturing as soon as possible. The Day 90s for these cases are 10/03 and 10/13, so we are relatively ahead of schedule for now.

I am available at 9-10am, or 11am-noon tomorrow if you have any additional questions.

Best regards,

Valerie

Valerie,
Can you set up a call with me, Peter Ranslow and Bobby Williamson to discuss the status of Georgia-Pacific Chemicals two pending PMNs P-18-0221 and P-18-0238?
Tomorrow morning (8/24) would be best for us.
Thanks,
Gayle MacAllister
